## SENIOR FRONTEND ENGINEER

Senior Frontend engineer with 5 years of experience specializing in frontend development. Successfully delivered over 10 projects leveraging Typescript/Javascript, VueJs/NuxtJs stack. Proficient in building scalable and performant web applications, optimizing user interactions, and streamlining codebase management. Consistently stays updated with the latest industry trends and technologies, integrating innovative solutions to enhance user experiences and drive business growth.

## PROFESSIONAL EXPERIENCE

**MIDDLEMAN TECHNOLOGIES** (<https://midddleman.co>)  
Engineering Lead/Frontend Engineer

March 2023 - Present

Middleman Technologies is an innovative all-in-one payments app that empowers e-commerce businesses by simplifying their financial transactions and logistics management. With our unique platform, users can seamlessly buy Chinese Yuan, send money to suppliers in China, and compare delivery fees from over 20 reliable logistics companies, all in one place. Middleman also aims to build trust with customers through secure escrow payment solutions, ensuring a smooth and efficient business experience.

### Responsibilities:

- Spearheaded a cross-functional team of engineers and designers, focusing on delivering high-quality solutions using Vue.js/Nuxt.js, C# .NET technologies, and Flutter for mobile development.
- Oversaw the development and deployment of scalable applications, ensuring seamless integration with backend services and third-party APIs, including payment services, Alipay, and logistics partners.
- Collaborated with the product manager to define technical requirements, set project milestones, and ensure alignment with the company's strategic objectives.
- Implemented user-friendly interfaces for the Middleman application, enhancing user experience and engagement through intuitive design and responsive layouts.
- Developed complex, feature-rich components using Vue.js and Nuxt.js, optimizing for performance, accessibility, and maintainability.
- Engineered a robust payment gateway system to streamline transactions for RMB purchases and Alipay wallet funding.
- Implemented an advanced logistics comparison feature, enabling users to access and evaluate 20+ courier services with a single click.
- Developed and optimized the Middleman escrow payment solution, enhancing customer trust.
- Collaborated with the mobile development team to ensure consistency between the web and mobile platforms.

**ADVANSIO INTERACTIVE (ADVANSIO.COM)**  
**Senior Frontend Engineer**

**October 2021 - Present**

- Worked in an agile environment with daily stand-ups, kept track of user stories/Tasks/bugs on ClickUp/Azure DevOps, and participated in 2 hours of sprint planning and sprint retrospectives every two weeks which helped to increase the task success rate by 25%.
- Led the Frontend development of a comprehensive Internet banking platform for a prominent financial institution. The project resulted in a 40% increase in customer adoption and a 25% reduction in operational costs.
- Successfully integrated advanced analytics and reporting functionalities into the admin platform, enabling administrators to gain valuable insights into merchant performance, transaction trends, and revenue generation.
- The data-driven decision-making capabilities facilitated strategic planning and optimization of agency banking operations, resulting in a 25% increase in revenue and improved business profitability.
- Piloted the development of a sophisticated admin platform for agency banking, enabling administrators to monitor merchant operations, regulate transactions, and generate data-driven reports.

**BODADMIN LIMITED (BODADMIN.COM)**  
**Lead Frontend Engineer**

**February 2023 - October 2023**

- Supervised, managed, and led the team of 3 Frontend engineers in the development of a robust upgrade of the BodAdmin suite which comprises the Governance Portal, corporate universe, and the Enterprise dashboard.
- Redeveloped the Regulatory Portal, a tool designed to manage the activities of various regulatory bodies such as the Financial Reporting Council (FRC), PENCOM, and SEC.
- Revamped a financial reporting portal, streamlining compliance with sector-specific regulations for Nigerian companies. Result: helped to Improve submission efficiency by 40%, facilitating seamless reporting to the Financial Reporting Council (FRC) during every reporting cycle.
- Collaborated with backend engineers to integrate new features on the Bodadmin suite/frontend components with backend services.
- Worked closely with the product designer to implement visually appealing and user-friendly interfaces.

**FIRST PAVILION TECHNOLOGIES.**  
**Frontend Engineer**

**April 2020 - January 2021**

- Spearheaded the creation of interactive web applications using Vue.js.
- Engineered reusable UI components and libraries, leading to a reduction in development time for subsequent projects.
- Developed dashboard interfaces, enhancing data visualization capabilities and facilitating data-driven decision-making processes, which leads to improvement in operational efficiency.
- Fostered seamless collaboration within the team, resulting in to increase in project delivery.
- Implemented task and defect management processes using JIRA/Trello, resulting in a 15% increase in task completion rates and a 20% reduction in backlog accumulation.
- Optimized web pages for enhanced performance, resulting in a decrease in the application page load times and also improved scalability.

**Frontend UI Developer**

- Developed codebases with a 99% stability rating, reducing bug resolution time by 25%.
- Collaborated with designers to implement responsive and cross-browser compatible designs to improve user satisfaction.
- Optimized the company's website performance achieving 100% compliance with accessibility standards.
- Monitored website performance, resolving frontend-related issues in realtime.

**SKILLS**

- Languages: HTML5, CSS3, TypeScript, JavaScript
- Frameworks: VueJs, NuxtJs, Vuex, Pinia, React
- Libraries: Vuetify, Bootstrap, Tailwind CSS, SASS, BEM
- Version Control: Git, GitHub, Bitbucket
- Build Tools: Webpack, Babel, vite
- Experience with AWS, Docker, RESTful APIs, GraphQL, and WebSockets
- Strong knowledge of responsive web design principles
- Proficient in code optimization, debugging, and performance tuning
- Experience with Agile development methodologies
